

Cell and Gene Therapy Services

Cell Therapy

Partner with Resolian

Cell and Gene Therapy (CGT) programs demand specific expertise, start-to-finish collaborator engagement and experience with regulators. Resolian's leaders have 15+ years supporting CGT studies, including contributions to more than 5 US FDA therapeutic approvals.

Resolian can contribute to the overall success of your CGT programs at any stage, from pre-discovery/discovery to clinical trial testing.

Resolian continues to build comprehensive capabilities, fostering a collaborative partnership where the team becomes an integral extension of your research efforts.

SERVICES

▶ Comprehensive Program Management

Streamlined sample logistics and services purpose-built for your science and development program design for efficient study execution.

▶ Multimodal Expertise

Proficiency with CAR-T, AAV, lentivirus, CRISPR/Cas-9, oligonucleotides, plasmid-LNP, mRNA, siRNA, vaccines, plasmids, expressed transgene products, anti-PEG.

▶ Scientific Support Across Disciplines

Agile implementation across Flow Cytometry, LC/MS, Immunoassay, ELISpot, and PCR for a holistic approach.

▶ Integrated Techniques

Agile implementation across Flow Cytometry, LC/MS, Immunoassay, and PCR for a holistic approach.

▶ Therapeutic Specialization

Offering you expertise in rare disease, pediatrics, neurology, cardiovascular disease, immunology, and more, tailoring support to the unique requirements of each indication.

▶ Regulatory Navigation

Active engagement with regulatory bodies, aligning with guidelines and facilitating regulatory approval.
